

X8

Product Guide

Getting Started

Unboxing

Inside the box, you will find:

- Airdog X8 Air Purifier Unit
- Power Adapter
- User Manual
- Remote Control

IOS DOWNLOAD

ANDROID DOWNLOAD

Placement Recommendations

- Place the purifier in a well-ventilated area, at least 50 cm away from walls or furniture.
- Keep it away from direct sunlight, moisture, and heat sources.
- Use on a flat, stable surface.

Powering ON

1. Plug the adapter into a standard power outlet.
2. Press the Power Button on the device or remote control.
3. The air purifier will start in Auto Mode, adjusting filtration speed as needed.

Maintenance & Cleaning

Cleaning the Filter System

To maintain optimal performance:

- Pre-Filter: Wash every 2 weeks to remove large dust particles.
- TPA® Plasma Filter: Rinse with water once a month and let dry completely.
- Carbon Filter: Replace every 6-12 months, depending on usage.

Cleaning the Exterior Unit

- Wipe with a soft dry cloth.
- Avoid harsh chemicals or water entering the device.

Frequently Asked Questions (FAQs)

Why is the AQI high even after using the purifier?

The AQI may remain high if the filters are dirty or clogged, so regular cleaning is essential. Ensure the purifier is placed in an open area with good airflow and not too close to walls or furniture. Air contaminants like perfume, candles, cooking fumes, or smoke can temporarily raise the AQI, so avoid using strong-scented products near the purifier for accurate readings. Keeping windows and doors closed prevents outdoor pollutants from affecting indoor air quality. If pollution levels are high, let the purifier run continuously in Auto Mode for better results.

It's stuck on 'C' cleaning indicator, how do I fix it?

The 'C' indicator means the filters need cleaning. Turn off and unplug the purifier before removing the filters. Wash the Pre-Filter and TPA® Plasma Filter with water, ensuring they dry completely before reinstalling. To reset the 'C' indicator, press and hold the reset button or follow the manual's instructions.

How often should I clean the filters?

Clean the Pre-Filter every 2 weeks to remove dust buildup. Rinse the TPA® Plasma Filter with water once a month and let it dry completely before reinserting. Replace the Carbon Filter every 6-12 months, depending on air quality and usage frequency.
